

Who Did It?

By: Rodrigo Alvarado, Eric Cheng, Mariana Warcholski, Olivia Wreden

Evidence against Sam Stubs

- Fingerprint Match
- Ink Match
- Blood Type Match
- DNA Fingerprint Color/Pattern Match
- DNA Sequence Match
- Motive

DNA Fingerprint/Color Match

The BRY DNA fingerprint color/pattern that belonged to Stubs also belonged to the DNA fingerprint color of crime scene 1.

It would suggest that Sam Stubs was indeed involved in the murder of Captain Cornball.

Ink Match

Sam Stubb's pen ink matched the ink on the note on Captain Cornball at the crime scene that said, "you are a dead man."

Blood Type Match

There was O type blood found at Crime Scene 1. Sam Stubs also has type O blood.

Fingerprint Match

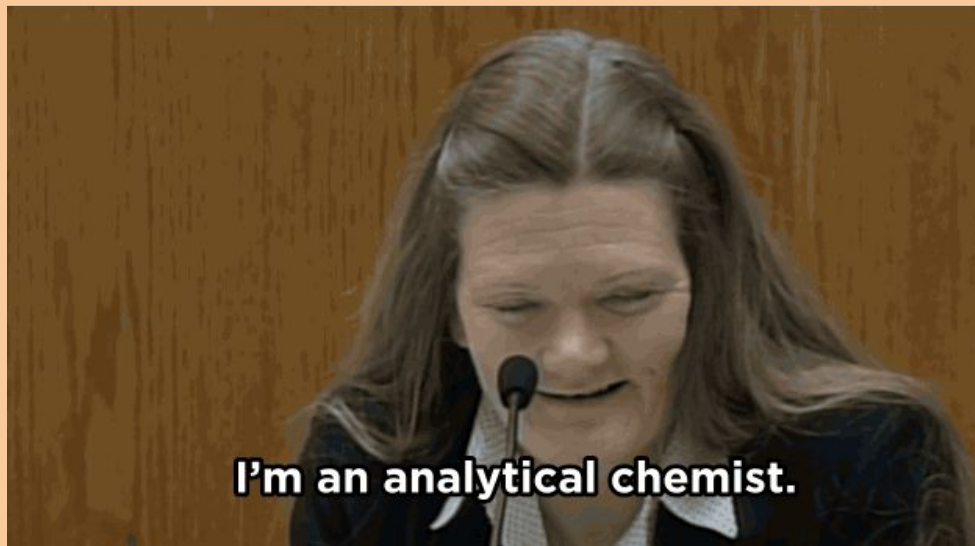

Sam Stubs had a fingerprint match to the one provided from the crime scene

DNA Sequence Match

Sam Stubs has the same DNA sequence (GATTCCGAACGG) as the one found at crime scene 2

Due to the fact that his DNA was left at the crime scene it is indicating that he was indeed at the crime scene. This helps to prove that he was there the night of the murder and that he could possibly be the murderer.

Motive

Sam Stubs killed Captain Cornball because Captain Cornball killed Sam's fiancée (Peebles Sandstone) creating extreme anger. Captain Cornball also put up Stub's brother for adoption after an affair between Cornball and Stub's mother.

But.. it would seem Norma Nanny could have also been involved

So Norma Nanny might be an accomplice...

We think that Norma Nanny and Sam Stubs were in it together involving the murder of Captain Cornball. Norma Nanny's pen also matched to the pen that wrote the note to Captain Cornball, had a blood type match to crime scene 2, matching DNA sequence to the sequence found at crime scene 2, and a matching DNA fingerprint color/match (RY) to the one found at crime scene 2. Also, Stubs has been seen with Nanny lately.

Norma Nanny's Three X Chromosomes

Norma Nanny has a chromosome disorder. This disorder, triple X syndrome, can cause emotional and behavioral problems which may give cause for a motive in this murder case.

Why no one else is involved

There is nobody else on the suspect list that matches completely to either crime scenes. Sam Stubs and Norma Nanny are the only two suspects that matched the evidence recovered from the crime scenes.

So Who Should be Imprisoned? (Arrest Warrant)

We believe both Norma Nanny & Sam Stubs should be Incarcerated

We believe that Norma Nanny:

- Is the accomplice to the murder of Captain Cornball

We believe that Sam Stubs:

- Is the actual murderer

Captain Cornball

Norma Nanny
